Office Action Summary

Art Unit: 2661

### DETAILED ACTION

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. Claims 14 - 28, *cutting out* the microcomponents in the substrate such that the individual microcomponents or groups of microcomponents are *separated from each other* (IE, removal of the material exceeds the thickness of the material), as shown in figures 5A - 5C, and also as described on pages 12 - 13, especially, lines 24 - 25.
- II. Claims 29 - 30, wherein the removal of the material *does not exceed the thickness of the material*. This is apparently shown in figure 7.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 Cfr 1.141. If claims are added after the

Art Unit: 2661

election, applicant must indicate which are readable upon the elected species. MPEP

§ 809.02(a).

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The depth of cutting into the substrate (material) is not the same in the above groups, being cutting through the material in group I, and cutting only partially through the material in group II .

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 Cfr 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 Cfr 1.48(b) and by the fee required under 37 Cfr 1.17(I).
